

ANDREW R. GOAD

SENIOR ANALYTICS & APPLIED DATA SCIENCE LEADER | DECISION SYSTEMS | CONSUMER CREDIT

Lexington, SC | 571-425-6810 | ar.goad@yahoo.com | linkedin.com/in/andrewrgoad | github.com/andrew-goad

EXECUTIVE PROFILE

Senior analytics and applied data science leader with 16+ years at Wells Fargo, the OCC, and Census. Led Collateral Protection Insurance (CPI) and other Consumer Auto remediation analytics representing \$1B+ in exposure and customer impact, from development and production through regulatory response. Advises senior decision-makers and strengthens delivery through matrix leadership, mentoring, and reusable guidance. Federal research and independent synthetic projects demonstrate analytical rigor, strategy testing, and human-owned validation of AI-assisted work.

REQUIREMENTS → EXECUTABLE REMEDIATION Business requirements; population identification; redress logic; FCRA/Metro 2; execution handoffs.	INDEPENDENT CHALLENGE → ASSURANCE Recalculation/reconciliation; challenger/sensitivity testing; UAT; data fitness; Audit/regulatory evidence.
DATA → DECISION EXPLANATION Longitudinal data; Tableau; Power BI (portfolio); automated narratives; data lineage and traceability.	LEADERSHIP → SUSTAINED DELIVERY 15+ workstreams led; 10+ efforts advised/peer reviewed; senior Decision Forums; mentoring and training.

PROFESSIONAL EXPERIENCE

WELLS FARGO | *Consumer Auto Finance*

Executive Director - Senior Lead Analytics Consultant

03/2018 - 04/2026

Vice President - Lead Analytics Consultant

06/2022 - 04/2026

03/2018 - 06/2022

Principal analytical architect for Collateral Protection Insurance (CPI), with ~850,000 accounts identified for remediation in the 2018 multistate settlement. Coordinated timelines and advised business, risk, legal, and execution partners on customer impact, treatment, and implementation.

- **CPI delivery and regulatory response (2018-2025):** Led seven years of development, recurring production, and regulatory response. Owned Direct/Indirect Auto redress recalculation and weekly proof-of-insurance intake/QA, integrating coverage changes, time-value-of-money relief, prior-payment netting, and manual review. Prepared federal-regulatory evidence supporting consent-order clearance efforts. Independent Audit found 100% alignment between retained proof-of-insurance evidence and reviewed third-party vendor inputs.
- **Broader remediation delivery (2020-2026):** Led 15+ additional workstreams, including Tier 1 servicemember benefits (SCRA), disaster relief, COVID deferrals, outage, and reporting issues. Defined requirements, business rules, populations, and execution handoffs. Owned SAS/SQL processing and validation evidence; coordinated dependencies through Population Identification Review (PIR), Independent Testing & Validation (IT&V), Audit, and regulatory review.
- **Senior decision support:** Framed customer-impact issues, compared treatment alternatives and customer/control consequences, and presented recommendations to senior Decision Forums. Documented resolved strategic differences in Risks, Issues, and Decision logs; incorporated approved decisions into execution and reviewed partner artifacts for alignment.
- **Matrix leadership and continuity:** Advised or peer reviewed 10+ additional credit-reporting efforts; mentored data leads and created training and knowledge-base articles. Helped IT&V close aged reviews after staff turnover through code/evidence reconstruction, reruns, and reconciliation to original execution.
- **Credit-reporting corrections and dashboard evidence:** Led ~200 Metro 2-aligned external CPI submissions and coordinated internal updates, preserving account lineage, before/after values, and effective dates. Validated SAS dashboard feeds supported complaint research, Audit validation, and leadership reporting on impact and progress.
- **Customer credit protections:** Standardized 500+ archived files covering 100M+ account-month actions. Built historical controls to protect favorable reporting from later overwrites; aligned proposed updates with prior activity, led UAT separately, and preserved remediation-versus-furnishing attribution.
- **Reusable furnishing strategy:** Challenged overbroad re-furnishing and benchmarked targeted alternatives that preserved customer protections while reducing cost by ~\$60K per submission. Advanced the strategy through FCRA Decision Forum and Common Code governance with requirements, a Job Aid, and department-wide training.
- **Requirements and validation evidence:** Vetted sources, attributes, and impact-period coverage. Proved population inclusion, exclusion, and redress calculations through documented QA. Aligned calculations with Finance policy and credit-reporting adjustments with FCRA guidance for peer, management, independent-controls, Audit, and regulatory review.
- **Tax-reporting delivery:** Standardized Consumer Auto 1099-INT/1099-MISC remediation reporting; ran annual CPI requirements, pilot, and production with independent testing and Audit support.

FEDERAL CREDIT-RISK & ANALYTICS EXPERIENCE

OFFICE OF THE COMPTROLLER OF THE CURRENCY (OCC) | *Credit Risk Analysis Division*

03/2014 - 03/2018

Research Analyst

Supported 16 Credit Risk Economists and examination teams with reconciled evidence, investigations, Tableau views, and explanations. Mentored junior analysts and interns.

- **Long-term Auto risk and pricing research:** Validated 875,516 loan histories / 2.36M loan-year observations for economist-led Journal of Credit Risk research. Engineered first 90-DPD events and Journal-version prepayment/maturity exits; reconciled sources, inputs, and outputs for discrete-time delinquency/logistic and OLS pricing analyses.
 - **DFAST examination support:** Analyzed bank data and nine-quarter stress projections for economists and examination teams. Tested decision-tree segmentation and compared aggregate/segment stressed performance to identify issues for review.
 - **CECL and lifetime risk:** Developed/tested marginal-PD term structures and vintage/cohort approaches. Evaluated vendor data and historical coverage, advised on acquisition, compared one-year/lifetime assumptions and sensitivities, and presented findings to economists.
- Research acknowledgments: "Risks of Long-Term Auto Loans," Journal of Credit Risk, and OCC WP-2020-03 publicly acknowledge Andrew Goad for "excellent research support."

U.S. CENSUS BUREAU | *Service Sector Statistics / Company Statistics*

07/2009 - 03/2014

Survey Statistician

Optimized Annual Capital Expenditures Survey (ACES) and Annual Retail Trade Survey (ARTS) cycles by directing analysts toward high-impact nonresponse and validation.

- **ACES production and workforce deployment:** Led a six-analyst nightly refresh workflow and resolved processing/data-quality escalations. Built SAS/Access/HTML/JavaScript dashboards comparing industry/company trends so managers could track progress, prioritize material discrepancies and nonrespondents, and reallocate resources.
- **ARTS validation and reporting:** Built industry-tailored SAS/Excel/VBA workbooks for on-demand investigation of company drivers and survey exceptions. Developed editing, imputation, response tracking, disclosure avoidance, and benchmarking with methodology, runbooks, and published reporting.

SELECTED APPLIED DATA SCIENCE & DECISION SYSTEMS PORTFOLIO

github.com/andrew-goad | Independent, synthetic, non-production | Human-in-the-Loop case study

Directed AI-assisted development and separate review; owned requirements, validation and acceptance.

- **MSBF · Merchant Credit Intelligence** (PostgreSQL / Python / Power BI): Designed configurable merchant financing repaid through a fixed share of daily sales. Challenged premature assessment stops and directed permitted counteroffer evaluation within evidence requirements and decision-authority limits.
- **Monitoring judgment:** Built Power BI diagnostics after initial project acceptance to investigate early adverse classifications. Challenged timing after funding, coordinated correction and separate AI-assisted review, and reconciled unchanged cash history and final outcomes across 130 funded scenario paths over 120 days.
- **Enterprise Credit Decisioning Strategy Simulator** (PostgreSQL / SAS / Power BI): Built configurable Module 2 policy/counteroffer testing: 39 runs of 50,000 synthetic applications (1.95M evaluations) comparing access, affordability, exposure, and routing. Separately reconciled 50,000 matched Module 1 applications in SAS. Power BI/DAX narratives connect application-level changes to workstreams such as mortgage affordability.
- **Survival Strategy Framework** (Python): Directed development and executed reproducible synthetic retention/time-to-event analysis with validation, risk comparisons, same-cohort scenarios, and executive/technical reports. Kept descriptive personas separate from the survival model.

ENTREPRENEURIAL EXPERIENCE

Pittsburgh #GoadLife | Independent Rental Business Operator | March 2025–Present

- Generated \$70K+ in gross bookings through September 2026. Maintained Airbnb Superhost (airbnb.com/h/pittsburgh-goadlife) and Vrbo Premier Host (vrbo.com/4496537) continuously since September 2025. Ratings: 4.83/5 across 52 Airbnb reviews; 10/10 across 22 Vrbo reviews.
- Manage the property remotely with local housekeeping, landscaping, and maintenance vendors. Use AI to assist with feedback, supplies, pricing, and accounting.

EDUCATION, CREDENTIALS & TECHNICAL TOOLKIT

- **Education:** Bachelor of Arts in Economics; Minor in Mathematics - Virginia Tech, Blacksburg, VA | 2005-2009.
- **Credentials:** SAS Base Programming and Advanced Programming Professional certifications (2009); Lean Six Sigma Yellow Belt - OCC; Associate Citation in Project Management - George Washington University.
- **Professional engineering:** SAS Enterprise Guide/Macro, PROC SQL, PROC FCMP; SQL/Teradata; Python; ETL; data governance, quality and lineage; source-to-target mapping; Git/GitHub; Excel/VBA; Tableau; ArcGIS.
- **Portfolio methods:** PostgreSQL; Power BI, Power Query/DAX; relational semantic modeling; pandas, NumPy, scikit-learn, lifelines; survival analysis (regularized CoxPH, Kaplan-Meier); K-Means; cross-validation, calibration and proportional-hazards review.
