ANDREW R. GOAD

SENIOR ANALYTICS & APPLIED DATA SCIENCE LEADER | DECISION SYSTEMS | CONSUMER CREDIT

Lexington, SC | 571-425-6810 | ar.goad@yahoo.com | linkedin.com/in/andrewrgoad | github.com/andrew-goad

EXECUTIVE PROFILE

Senior analytics and applied data science leader with 16+ years building analytical products across Wells Fargo, the OCC and Census. Developed and owned Collateral Protection Insurance (CPI) and other Consumer Auto remediation analytics representing $1B+ in exposure and customer impact. Combines credit-risk research and statistical-production leadership with senior recommendations, matrix coordination and mentoring. Independent, synthetic projects demonstrate credit-strategy design, Python time-to-event analysis and Power BI/Tableau decision explanations.

Analytical products: SAS/SQL data engineering, customer-redress systems and reusable delivery tools.

Validation and challenge: Source fitness, calculation testing, reconciliation and treatment alternatives.

Decision support: Dashboards, account-level explanations and recommendations for business leaders.

Leadership and adoption: Matrix coordination, mentoring and training that carry decisions into production.

PROFESSIONAL EXPERIENCE

WELLS FARGO | *Consumer Auto Finance* **03/2018 - 04/2026**

Executive Director - Senior Lead Analytics Consultant **06/2022 - 04/2026**

Vice President - Lead Analytics Consultant **03/2018 - 06/2022**

Principal analytical architect for CPI customer remediation, whose publicly reported scope included ~850,000 accounts. Coordinated timelines and advised business, risk, legal and execution partners on treatment and implementation.

• **CPI delivery and regulatory response (2018-2025):** Developed and owned Direct/Indirect Auto redress recalculation and weekly proof-of-insurance intake/QA across seven years of recurring production. Incorporated coverage changes, time-value-of-money relief, prior-payment netting and manual review; prepared federal-regulatory evidence supporting consent-order clearance efforts. Independent Audit found 100% alignment between retained proof-of-insurance evidence and reviewed third-party vendor inputs.

• **Broader remediation delivery (2020-2026):** Led 15+ additional workstreams covering servicemember benefits (SCRA), disaster relief, COVID deferrals, outages and reporting issues. Owned SAS/SQL processing, requirements, business rules and validation evidence; coordinated population review, independent testing, Audit and regulatory review through execution handoffs.

• **Senior decision support:** Framed customer-impact issues, compared treatment alternatives and customer/control consequences, and presented recommendations to senior Decision Forums. Documented resolved strategic differences in Risks, Issues, and Decision logs; incorporated approved decisions into execution and reviewed partner artifacts for alignment.

• **Targeted credit-reporting strategy:** Challenged overbroad re-furnishing, benchmarked alternatives and designed account- and impact-month execution that preserved customer protections while reducing cost by ~$60K per credit-reporting submission. Advanced the approach through FCRA and shared-code governance for department-wide use, with requirements, a Job Aid and training.

• **Matrix leadership and continuity:** Advised or peer reviewed 10+ additional credit-reporting efforts; mentored data leads and created training and knowledge-base articles. Helped independent validation teams close aged reviews after staff turnover through code/evidence reconstruction, reruns and reconciliation to original execution.

• **Credit-reporting corrections and dashboard evidence:** Led ~200 external CPI credit-reporting submissions aligned to Metro 2; coordinated internal updates and preserved account lineage, before/after values and effective dates. Built and validated SAS dashboard feeds for complaint research, Audit and leadership reporting on impact and progress.

• **Customer credit protections:** Protected favorable credit reporting from later overwrites through historical controls built on 500+ archived files covering 100M+ account-month actions. Aligned proposed updates with prior activity, led separate user acceptance testing, and preserved remediation-versus-furnishing attribution.

• **Source and calculation integrity:** Verified source suitability, attributes, impact-period coverage, population inclusion/exclusion and redress calculations through documented QA. Aligned calculations with Finance policy and credit-reporting adjustments with FCRA guidance.

• **Tax-reporting delivery:** Standardized Consumer Auto 1099-INT/1099-MISC remediation reporting; ran annual CPI requirements, pilot, and production with independent testing and Audit support.

FEDERAL CREDIT-RISK & ANALYTICS EXPERIENCE

OFFICE OF THE COMPTROLLER OF THE CURRENCY (OCC) | *Credit Risk Analysis Division* **03/2014 - 03/2018**

Research Analyst

Supported 16 Credit Risk Economists and examination teams with reconciled evidence, investigations, Tableau views, and explanations. Mentored junior analysts and interns.

• **Long-term Auto risk and pricing research:** Built and validated 875,516 loan histories / 2.36M loan-year observations for economist-led Journal of Credit Risk research. Engineered first 90-DPD events and Journal-version prepayment/maturity exits; reconciled sources, inputs, and outputs for discrete-time delinquency/logistic and OLS pricing analyses.

• **DFAST examination support:** Analyzed bank data and nine-quarter stress projections for economists and examination teams. Tested decision-tree segmentation and compared aggregate/segment stressed performance to identify issues for review.

• **CECL and lifetime risk:** Developed/tested marginal-PD term structures and vintage/cohort approaches. Evaluated vendor data and historical coverage, advised on acquisition, compared one-year/lifetime assumptions and sensitivities, and presented findings to economists.

Research support acknowledged in “Risks of Long-Term Auto Loans” (Journal of Credit Risk) and OCC WP-2020-03.

U.S. CENSUS BUREAU | *Service Sector Statistics / Company Statistics* **07/2009 - 03/2014**

Survey Statistician

Improved Annual Capital Expenditures Survey (ACES) and Annual Retail Trade Survey (ARTS) cycles through production analytics and analyst tools.

• **ACES production and workforce deployment:** Led a six-analyst nightly refresh workflow and resolved processing/data-quality escalations. Built SAS/Access/HTML/JavaScript dashboards using industry/company trends so managers could prioritize material discrepancies and nonrespondents, track progress and reallocate resources.

• **ARTS validation and reporting:** Built industry-tailored SAS/Excel/VBA workbooks for on-demand investigation of company drivers and survey exceptions. Developed editing, imputation, response tracking, disclosure avoidance, and benchmarking with methodology, runbooks, and published reporting.

SELECTED APPLIED DATA SCIENCE & DECISION SYSTEMS PORTFOLIO

github.com/andrew-goad | Independent, synthetic, non-production | Human-in-the-Loop case study
Directed AI-assisted development and separate review; owned requirements, validation and acceptance.

• **MSBF · Merchant Credit Intelligence**: Developed configurable merchant financing repaid through a fixed share of daily sales, connecting cash-flow evidence to terms, decision authority and servicing. Built Power BI lifecycle/decision views and Tableau views comparing baseline and stress outcomes.

• **Human-led product refinement:** Challenged accepted rules that stopped before testing permissible financing alternatives. Reopened monitoring after Power BI exposed premature adverse classifications; directed timing corrections and separate AI-assisted review across 130 funded scenario paths over 120 days.

• **Enterprise Credit Decisioning Strategy Simulator**: Built a five-product synthetic bank application portfolio and configurable strategy engine, with detailed requirements and validation evidence. Evaluated 50,000 application IDs across 39 runs (1.95M repeated decisions); SAS reconciliation and Power BI/DAX explain release changes.

• **Survival Strategy Framework** (Python): Developed a reusable framework connecting data contracts, time-to-event modeling, validation, same-cohort scenarios and executive/technical reports; kept descriptive personas separate from the survival model.

ENTREPRENEURIAL EXPERIENCE

Pittsburgh #GoadLife | Independent Rental Business Operator | March 2025–Present

• Generated $70K+ in gross bookings through September 2026. Maintained Airbnb Superhost and Vrbo Premier Host continuously since September 2025.

• Manage the property remotely with local housekeeping, landscaping and maintenance vendors.

EDUCATION, CREDENTIALS & TECHNICAL TOOLKIT

• **Education:** Bachelor of Arts in Economics; Minor in Mathematics - Virginia Tech, Blacksburg, VA | 2005-2009.

• **Credentials:** SAS Base Programming and Advanced Programming Professional certifications (2009); Lean Six Sigma Yellow Belt - OCC; Associate Citation in Project Management - George Washington University.

• **Professional engineering:** SAS Enterprise Guide/Macro, PROC SQL, PROC FCMP; SQL/Teradata; Python; ETL; data governance, quality and lineage; source-to-target mapping; Git/GitHub; Excel/VBA; Tableau; Power BI; ArcGIS.

• **Portfolio methods:** PostgreSQL; Power BI, Power Query/DAX; Tableau; relational semantic modeling; pandas, NumPy, scikit-learn, lifelines; survival analysis (regularized CoxPH, Kaplan-Meier); K-Means; cross-validation, calibration and proportional-hazards review.
