

ANDREW R. GOAD

SENIOR ANALYTICS & APPLIED DATA SCIENCE LEADER | DECISION SYSTEMS | CONSUMER CREDIT

Lexington, SC | 571-425-6810 | ar.goad@yahoo.com | linkedin.com/in/andrewrgoad | github.com/andrew-goad

EXECUTIVE PROFILE

Senior analytics and applied data science leader with 16+ years at Wells Fargo, the OCC, and Census. Led Collateral Protection Insurance (CPI) and other Consumer Auto remediation analytics representing \$1B+ in exposure and customer impact, from analytical development and recurring production through regulatory response. Builds evidence for senior decisions and strengthens delivery through matrix leadership, mentoring, and reusable guidance. Federal experience combines credit-risk research and survey operations; independent synthetic projects demonstrate credit-strategy testing, Power BI explanations, and AI-assisted development with human-owned validation and acceptance.

REQUIREMENTS → EXECUTABLE REMEDIATION Business requirements; population identification; redress logic; FCRA/Metro 2; execution handoffs.	INDEPENDENT CHALLENGE → ASSURANCE Recalculation/reconciliation; challenger/sensitivity testing; UAT; data fitness; Audit/regulatory evidence.
DATA → DECISION EXPLANATION Longitudinal data; Tableau; Power BI (portfolio); automated narratives; data lineage and traceability.	LEADERSHIP → SUSTAINED DELIVERY 15+ workstreams led; 10+ efforts advised/peer reviewed; senior Decision Forums; mentoring and training.

PROFESSIONAL EXPERIENCE

WELLS FARGO | *Consumer Auto Finance*

Executive Director - Senior Lead Analytics Consultant

Vice President - Lead Analytics Consultant

03/2018 - 04/2026

06/2022 - 04/2026

03/2018 - 06/2022

Tools: SAS (Enterprise Guide), SQL, Teradata, Git/GitHub, Excel, PuTTY, SharePoint, Jira, PowerPoint

Served as principal analytical architect for CPI, which had ~850,000 accounts identified for remediation in the 2018 multistate settlement. Led Consumer Auto analytics through execution and review; coordinated project timelines and advised business, risk, legal, and execution partners on customer impact, treatment, and implementation.

- **CPI delivery and regulatory response (2018-2025):** Led seven years of analytical development, recurring production, and regulatory response for CPI. Designed and owned Direct and Indirect Auto redress recalculation and weekly proof-of-insurance intake/QA, incorporating coverage adjustments, time-value-of-money relief, prior-payment netting, and manual-review outcomes. Prepared intake, treatment, and methodology/QA evidence for federal-regulatory requests supporting consent-order clearance efforts. Independent Audit found 100% alignment between retained proof-of-insurance evidence and reviewed third-party vendor inputs.
- **Broader remediation delivery (2020-2026):** Led 15+ additional workstreams, including Tier 1 servicemember benefits (SCRA), disaster relief, COVID deferrals, a data-center outage, payoff-date reporting, and furnishing issues. Defined analytical requirements, business rules, and affected populations for review and execution handoff. Owned SAS/SQL processing and validation evidence; coordinated dependencies through Population Identification Review (PIR), Independent Testing & Validation (IT&V), Audit, and regulatory review.
- **Remediation decision leadership:** Framed customer-impact issues, compared treatment alternatives and customer/control consequences, and presented recommendations to senior Decision Forums. Documented resolved strategic differences in Risks, Issues, and Decision logs; incorporated approved decisions into analytical execution and reviewed partner-owned artifacts for alignment.
- **Matrix leadership and review continuity:** Advised or peer reviewed 10+ additional credit-reporting efforts; mentored data leads and developed knowledge-base articles and training. Partnered with IT&V to close aged reviews after staff turnover through code/evidence reconstruction, end-to-end reruns, and reconciliation to original execution.
- **CPI credit-reporting correction and dashboard evidence:** Led corrections through ~200 Metro 2-aligned external mass-maintenance submissions and coordinated internal updates. Preserved account lineage, before-and-after values, and effective dates. Built and validated SAS feeds supporting dashboards so business users could investigate customer account paths, Audit could validate actions, and leaders could track impact and progress.
- **Preserving favorable customer credit reporting:** Built historical action records and account-month controls to protect favorable reporting against later remediation, complaint, or furnishing overwrites. Standardized 500+ archived submission files representing 100M+ account-month actions; aligned proposed updates with prior activity, led User Acceptance Testing (UAT) separately, and supported targeted correction. Preserved remediation-versus-furnishing attribution.
- **Targeted furnishing strategy and reusable Common Code:** Challenged a defensible but overbroad credit re-furnishing approach; benchmarked broad and targeted alternatives; designed account- and impact-month execution that preserved favorable reporting and customer protection; reduced cost by ~\$60K per submission; and advanced the solution through the FCRA Decision Forum and Common Code governance with a BRD, Job Aid, and department-wide training.
- **Requirements and validation evidence:** Vetted source and attribute suitability and impact-period coverage; documented QA proving population inclusion, exclusion, and redress calculations. Aligned financial calculations with Finance policy and credit-reporting adjustments with FCRA guidance; maintained evidence for peer, management, independent-controls, Audit, and regulatory review.
- **Tax-reporting delivery:** Standardized Consumer Auto Remediation 1099-INT/1099-MISC reporting and operated the annual CPI requirements-to-pilot-to-production cycle with independent testing and Audit support.

FEDERAL CREDIT-RISK & ANALYTICS EXPERIENCE

OFFICE OF THE COMPTROLLER OF THE CURRENCY (OCC) | *Credit Risk Analysis Division*

03/2014 - 03/2018

Research Analyst

Tools: SAS (Enterprise Guide), SQL, Python, Tableau, ArcGIS, Excel/VBA, Adobe batch processing

Partnered with 16 OCC Credit Risk Economists and provided requested analysis to examination teams. Recalculated/reconciled evidence, investigated results, and delivered Tableau views and explanations; mentored junior analysts and interns.

- **Long-term Auto risk and pricing research:** Built and validated histories covering 875,516 loans / 2.36M loan-year observations for economist-led Journal of Credit Risk research on long-term auto-loan risk and pricing. Engineered longitudinal inputs, first 90-DPD events, and Journal-version prepayment/maturity exits; reconciled source data, model inputs, and outputs for discrete-time delinquency/logistic and OLS pricing analyses.

- **DFAST examination and stress-testing support:** Analyzed bank data and nine-quarter stress projections for OCC economists and examination teams. Tested portfolio segmentation using decision trees and compared aggregate and segment-level stressed performance to identify issues for further review.

- **CECL and lifetime credit-risk analysis:** Developed and tested marginal-PD term structures and vintage/cohort approaches to compare one-year and lifetime risk implications for OCC economists. Evaluated vendor data and historical coverage, advised on acquisition, compared assumptions and sensitivities, and presented recurring findings.

- **Cross-bank and cross-product credit analysis:** Built SAS entity-resolution and fuzzy-matching logic to compare banks' internal risk ratings on shared syndicated-credit obligors and exposures. Standardized data and investigated match exceptions. Separately sequenced obligor-level delinquency/default events across consumer products.

Selected research supported: "Risks of Long-Term Auto Loans," *Journal of Credit Risk*; and "A Puzzle in the Relation Between Risk and Pricing of Long-Term Auto Loans," OCC WP-2020-03. Both publications publicly acknowledge Andrew Goad for "excellent research support."

U.S. CENSUS BUREAU | *Service Sector Statistics / Company Statistics*

07/2009 - 03/2014

Survey Statistician

Tools: SAS, SQL, Microsoft Access, Excel/VBA, JavaScript, HTML

Optimized Annual Capital Expenditures Survey (ACES) and Annual Retail Trade Survey (ARTS) cycles with analytical tools directing analysts toward high-impact nonresponse follow-up and data validation.

- **ACES workforce deployment and production leadership:** Led day-to-day production for a six-analyst nightly refresh team and handled processing and data-quality escalations. Built SAS-to-Access-to-JavaScript/HTML dashboards for material discrepancies and high-impact nonrespondents. Managers could use year-over-year industry/company views to monitor progress, reallocate resources, and communicate results.

- **ARTS validation and statistical reporting:** Built industry-tailored SAS-to-Excel/VBA workbooks that analysts refreshed on demand to investigate company-level drivers of industry anomalies and survey exceptions. Developed editing, imputation, response-tracking, disclosure-avoidance, and benchmarking processes, with methodology, runbooks, and published reporting.

SELECTED APPLIED DATA SCIENCE & DECISION SYSTEMS PORTFOLIO

github.com/andrew-goad | Independent, synthetic, non-production | [Human-in-the-Loop case study](#)

Directed AI-assisted development and separate review; owned requirements, validation and acceptance.

- **MSBF · Merchant Credit Intelligence (PostgreSQL / Python / Power BI):** Designed a configurable demonstration of merchant financing repaid through a fixed share of daily sales. Challenged premature assessment stops and directed evaluation of permitted counteroffers while preserving evidence requirements and decision-authority limits.

- **Monitoring diagnosis and analytical judgment:** Built Power BI diagnostics after initial project acceptance to investigate early adverse classifications. Challenged monitoring timing after funding, coordinated correction and separate AI-assisted review, and reconciled unchanged cash history and final outcomes across 130 funded scenario paths over 120 days.

- **Enterprise Credit Decisioning Strategy Simulator (PostgreSQL / SAS / Power BI):** Built configurable credit-policy and counteroffer testing in Module 2; executed 39 runs of 50,000 synthetic applications (1.95M evaluations) to compare access, affordability, exposure, and routing. Separately, reconciled 50,000 matched Module 1 applications in SAS. Power BI and DAX narratives connect application-level changes to design workstreams, including mortgage affordability.

- **Survival Strategy Framework (Python):** Directed development and executed a reproducible synthetic customer-retention/time-to-event workflow with data preparation, validation, risk comparisons, same-cohort scenarios and executive/technical reports; kept descriptive personas separate from the survival model.

ENTREPRENEURIAL EXPERIENCE

Pittsburgh #GoadLife | Independent Rental Business Operator | March 2025–Present

- Launched a Pittsburgh short-term rental generating \$70K+ in gross bookings through September 2026; maintained Airbnb Superhost (airbnb.com/h/pittsburgh-goadlife) and Vrbo Premier Host (vrbo.com/4496537) recognition continuously since September 2025. Guest ratings: 4.83/5 across 52 Airbnb reviews and 10/10 across 22 Vrbo reviews.

- Manage the Pittsburgh property remotely, coordinating local housekeeping, landscaping and maintenance vendors. Use AI to assist with guest feedback, supply reorders, pricing and accounting.

EDUCATION, CREDENTIALS & TECHNICAL TOOLKIT

- **Education:** Bachelor of Arts in Economics; Minor in Mathematics - Virginia Tech, Blacksburg, VA | 2005-2009.

- **Credentials:** SAS Base Programming and Advanced Programming Professional certifications (2009); Lean Six Sigma Yellow Belt - OCC; Associate Citation in Project Management - George Washington University.

- **Professional engineering:** SAS Enterprise Guide/Macro, PROC SQL, PROC FCMP; SQL/Teradata; Python; ETL; data governance, quality and lineage; source-to-target mapping; Git/GitHub; Excel/VBA; Tableau; ArcGIS.

- **Portfolio methods:** PostgreSQL; Power BI, Power Query/DAX; relational semantic modeling; pandas, NumPy, scikit-learn, lifelines; survival analysis (regularized CoxPH, Kaplan-Meier); K-Means; cross-validation, calibration and proportional-hazards review.
